L'Acier

FINE STEEL COOKWARE

Campaign data report

Goal and proposals

We plan to adjust our ad strategy and budget to maximize conversions. We propose:

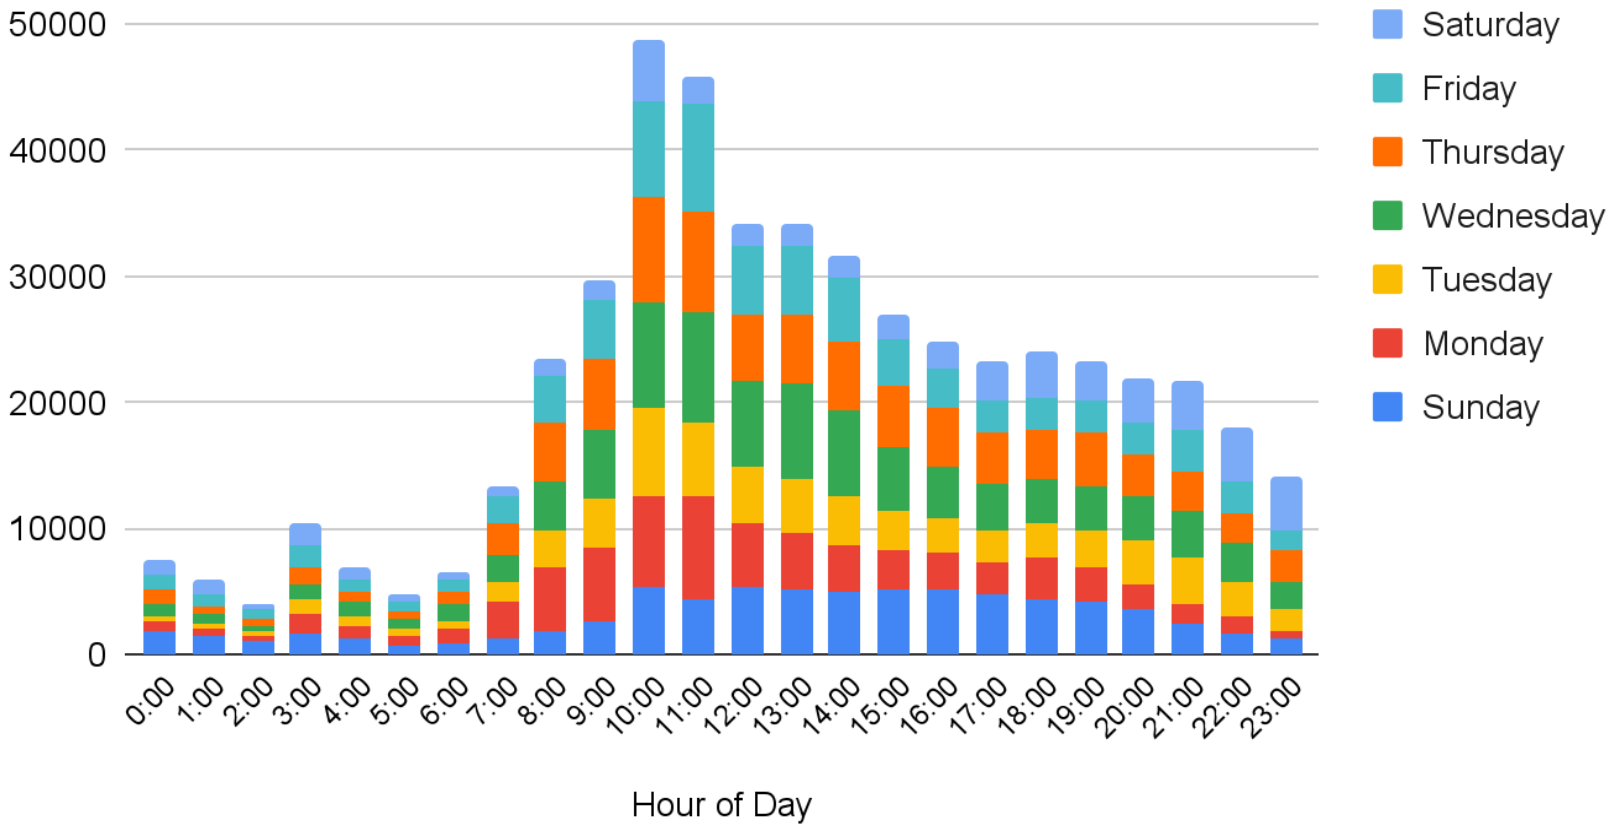
- **Running more ads during peak conversion periods to increase traffic**
- **Running fewer ads when session volume is high, but conversions are low**

Key performance indicators (KPIs)

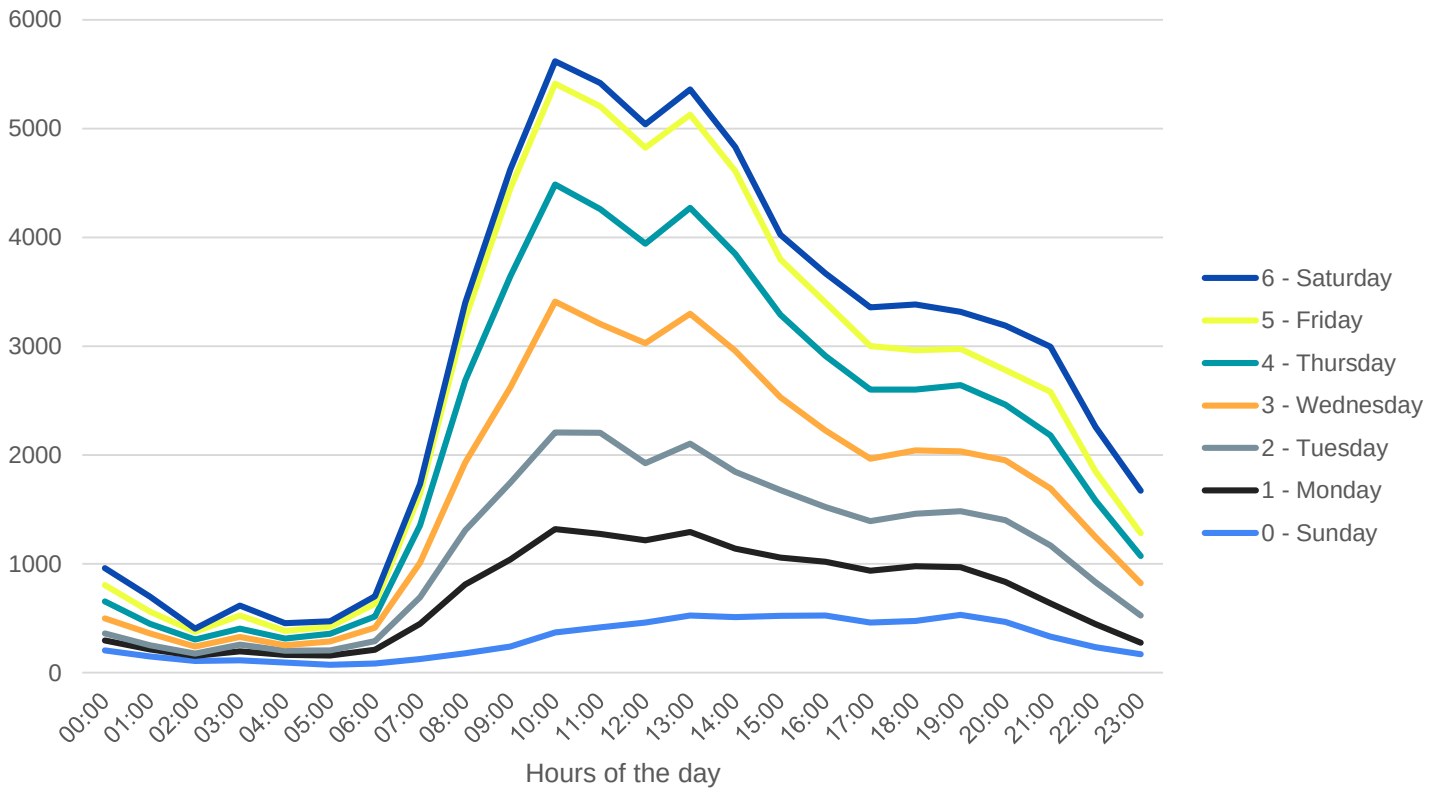
Metrics we examined:

- **Daily sessions (site visits)**
- **Conversions (account creations)**
- **Conversion rate**

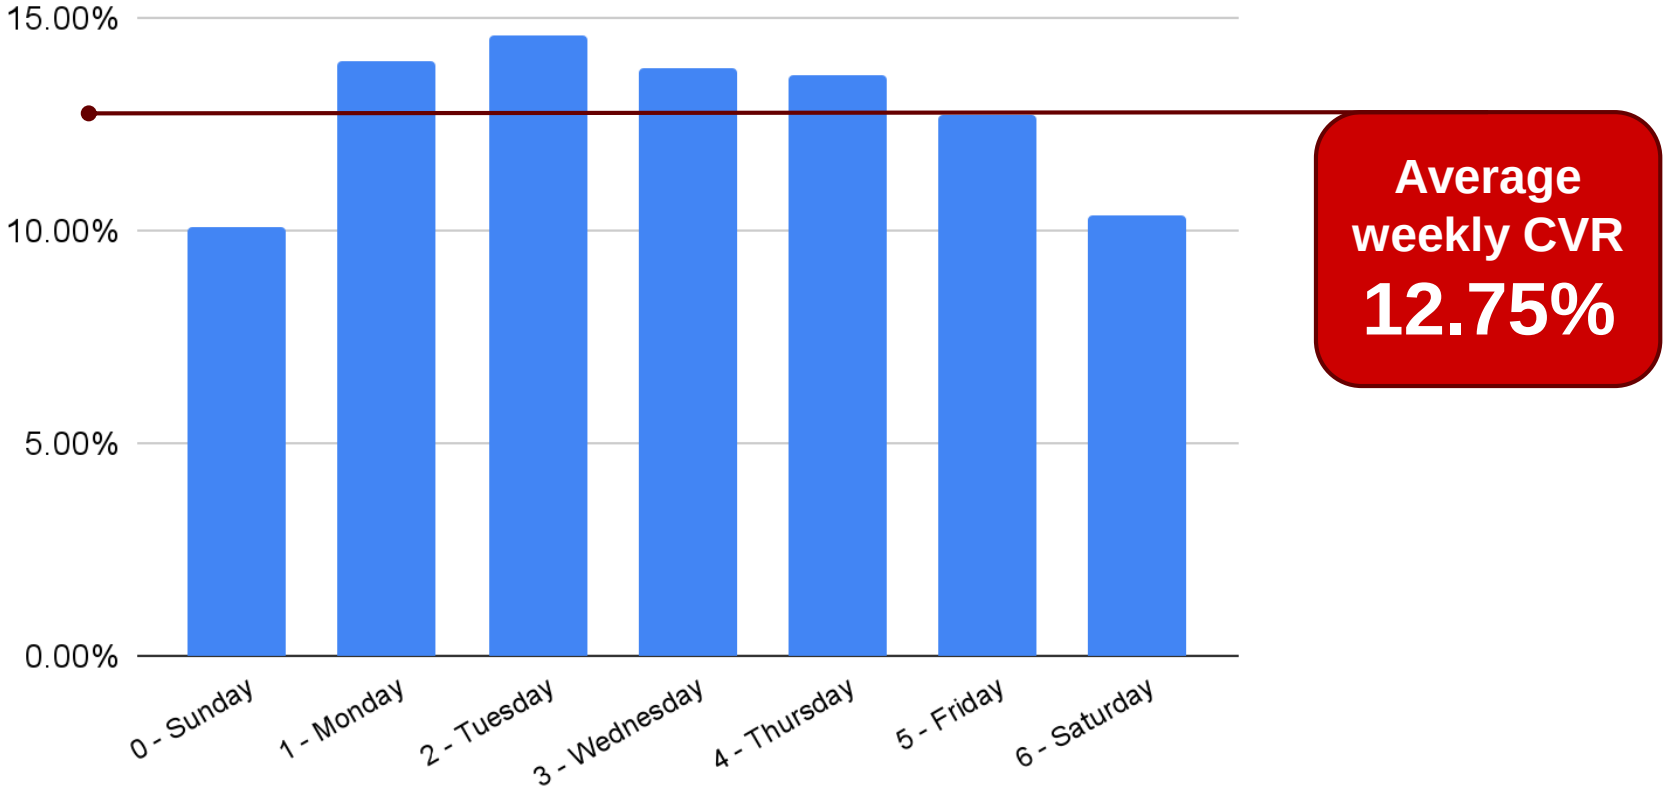
Total sessions by hour of day



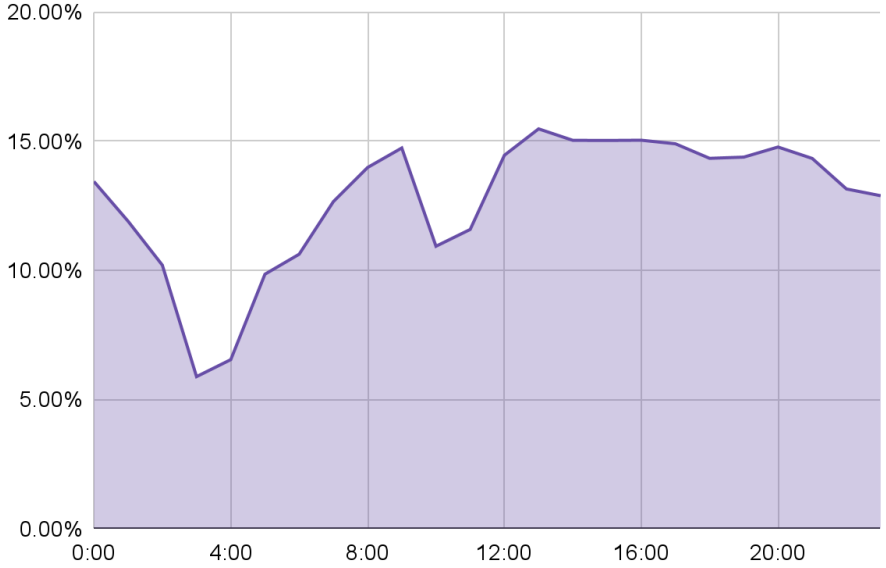
Total conversions by hour of day



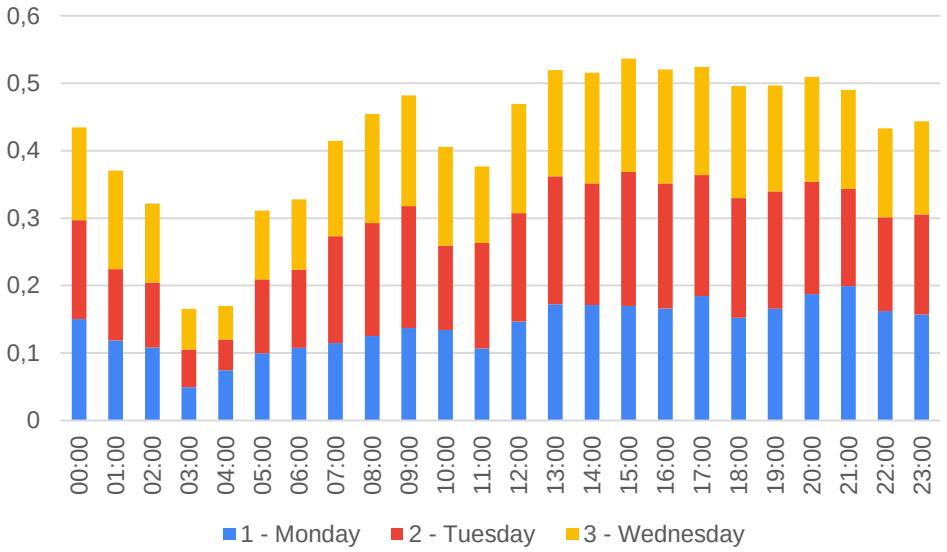
Average conversion rates by day of week



Weekly average conversion rates by hour of day



Monday-Wednesday conversion rates by hour of day



Conclusions and next steps

- Run Ads during the week ideally from Monday to Thursday in order to obtain ideal conversion rates
- Run Ads between 12AM to 8PM to maximize conversion rates avoid other hours of the day due to low conversion rate
- Avoid running Ads on weekend due to low conversion rates
